

D'Anjou Pear

The D'Anjou Pear is a large pear. The flesh is white with abundant juice and a sweet brisk flavor. It is a naturally sweet pear, light green in color with a yellow tinge when ripe. Anjou pears have exceptional keeping qualities.

The best flavor is realized when stored 1-2 months.

The tree is very hardy, large and highly productive. The D'Anjou does not change color as it ripens. Requires cross pollination with Bartlett or any other pear with the same bloom date.
